Profile

Group Product Manager with 10+ years' experience across product and engineering, building and scaling data-driven consumer products. Led multi-squad teams to deliver sustained double-digit growth in engagement and revenue, across platforms handling millions of transactions daily. Experience spans FinTech, AdTech, Payments, and Sports Data with a focus on turning complex data into scalable product strategies that drive high-impact outcomes.

Experience

Sportradar

● Group Product Manager | Mar 2025 - Present

- Lead and mentor a team of 6 Product Managers across sports content and fan engagement products, defining a clear product vision and outcome-driven roadmaps for core sports such as soccer, tennis and basketball within the ~€55m odds portfolio.
- Drove +24% YoY growth in monthly active users by launching high-impact initiatives, including AI-powered personalised betting experiences and long-tail sports product lines.
- Increased adoption of AI-personalisation features by 32% within 3 months by enhancing go-to-market strategy through cross-functional alignment (Engineering, Data, Design, Commercial, Marketing, Legal, Support).
- Delivered +45% YoY revenue growth across two product lines by doubling subscriptions and optimising margins with the launch of more granular player betting opportunities through deeper data modelling.
- Defined and executed 1-3 year product strategies across multiple product lines, translating vision into quarterly OKRs and measurable outcomes.

● Senior Product Manager | Mar 2023 - Mar 2025

- Managed 2 direct reports while mentoring PMs across the wider product organisation, contributing to overall team capability and growth.
- Led two product development teams to develop AI-powered personalisation and recommendation features driving +41% growth in product subscriptions within 12 months.
- Built and scaled a 0-1 greenfield product and team, launching a core platform capability which processes 9M transactions a day, driving €3.2M additional monthly revenue.

● Product Manager | May 2022 - Mar 2023

- Product owner of a machine-learning product centred around growing fan-engagement, through the use of stochastic mathematical models and deep data insights, doubling active users within 9 months.

Amobee

Associate Product Manager | May 2021 - May 2022

- Led the implementation of the creative management tooling within ITV's PlanetV advertising platform. Focused on product specification and delivery of a subset of features within a complex Addressable TV platform.

Worldpay

Full-stack Developer | Oct 2016 - Apr 2021

- Starting as a front-end engineer using Angular and React technologies, worked on several high-volume payment products which processed billions of payments daily. Eventually up-skilled across AWS technologies to become a full-stack engineer specialising in Java and Typescript.

Education

Queen Mary, University of London

BSc Computer Science with industrial experience: First Class with Honours
