Profile

Group Product Manager with 10+ years across product and engineering in Payments, FinTech, Sports Data and AdTech. Starting as a full-stack engineer and growing into P&L ownership, I combine technical depth, behavioural insight, and commercial judgement to lead teams that deliver measurable product and business outcomes. Most recently owned a €55M portfolio spanning personalisation, predictive modelling, and high-engagement products.

Experience

Sportradar

● Group Product Manager | Mar 2025 - Present

- Scaled and developed a team of 6 Product Managers across core sports content, establishing product operating models that introduced structured planning cycles, OKR frameworks and cross-functional alignment
- Owned strategy and roadmap for a €55M business-critical odds platform - translating a 3-year vision into quarterly OKRs and delivering platform modernisation that enabled 7x faster time-to-market.
- Shipped AI-personalised betting experiences that grew bets placed by 22% within the first year, contributing to sustained revenue growth of +45% YoY.
- Drove 2x subscription growth and improved margins by ~8p.p through enhanced player data insights and deepened behavioural modelling.
- Accelerated adoption of personalisation experiences by 32% within 3 months through refined go-to-market execution and alignment across Engineering, Data, Design, Commercial, Marketing, Legal, and Support.

● Senior Product Manager | Mar 2023 - Mar 2025

- Managed and mentored a team of 2 PMs, improving product execution through structured coaching and raising overall delivery consistency across fan engagement initiatives.
- Led two product teams to ship AI-powered personalisation and recommendation features, driving +41% growth in product subscription within 12 months.
- Built a 0-to-1 platform capability from scratch - assembling the team, shaping the product strategy, and launching a product that now processes 9M transactions daily, generating €3.2M in incremental monthly revenue.

● Product Manager | May 2022 - Mar 2023

- Built and scaled a machine learning fan-engagement product, leveraging predictive models and behavioural insights to 2x active users within 9 months.

Amobee

Associate Product Manager | May 2021 - May 2022

- Led the creative management tooling initiative within ITV's Planet V advertising platform, focusing on content upload, configuration and campaign delivery which has now launched over 41,000+ campaigns.

Worldpay

Full-stack Developer | Oct 2016 - Apr 2021

- Built and launched global eCommerce checkout capabilities, enabling merchants to accept secure and compliant online payments across multiple markets. Engineered several high-volume payment products which processed 1B+ payments daily. Developed strong expertise in Java, Typescript and React.

Education

Queen Mary, University of London

BSc Computer Science with industrial experience: First Class with Honours
